REASONS FOR ALLOWANCE

Allowable Subject Matter

1. Claims 1-12 and 16-19 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to teach a satellite ground station system of the type capable of receiving and transmitting RF signals to a satellite, a transmitted signal having a transmission power level as determined by a signal control unit of said system, said signal control unit configured to measure the power supplied to a transceiver and to vary the power level of said transmitted RF signal based on said measured power such that a maximum transmitted RF power level is determined based on said measured power, wherein said measured power does not include RF power.

Moerder in view of Kintis disclosed a satellite ground station system of the type capable of receiving and transmitting RF signals to a satellite, a transmitted signal having a transmission power level as determined by a signal control unit of said system, said signal control unit configured to measure a dc current and to vary the power level of said transmitted RF signal based on said measured dc current such that a maximum transmitted RF power level is determined based on said measured dc current, wherein said measured power does not include RF power. Moerder and Kintis however failed to teach controlling the maximum power based on measure power supplied where the measured power supplied is does not RF power.
